## FOREWORD

This report is one of a series of provincial reports on the results of the 1980 Census of Population and Housing conducted on May 1, 1980.

Demographic data presented herein consist of population distributions according to age, sex, marital status, highest grade completed and literacy. Other bases as gainful occupation, industry and migration are included likewise.

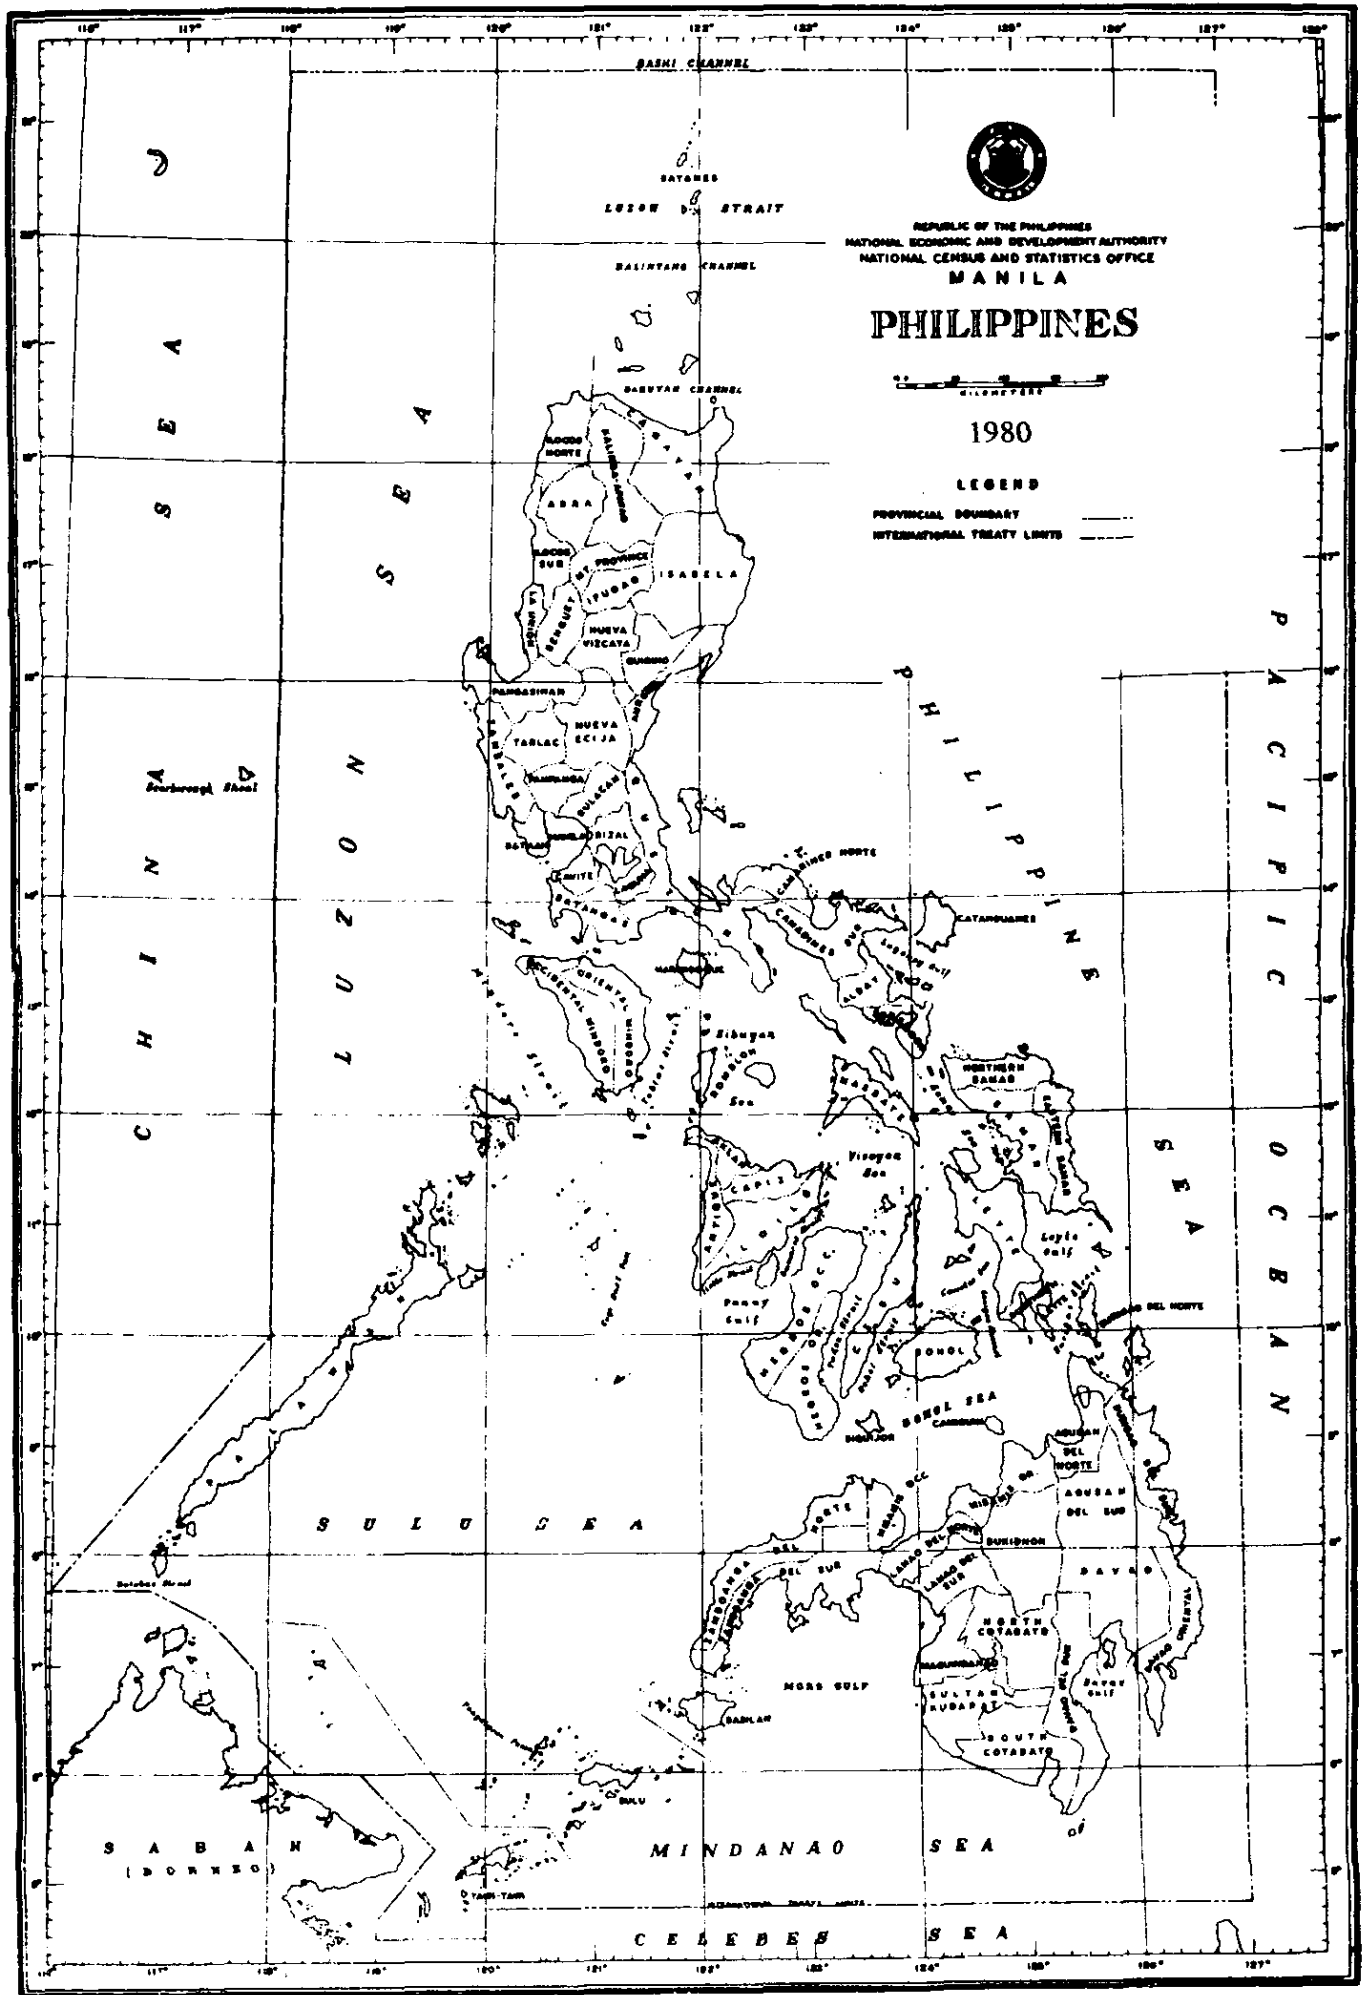

In the other aspect of the census, the following housing characteristics are considered: type of building, structural characteristics, floor area, type of tenure, use and source of water supply, lighting, type of toilet facilities, kind of cooking fuel used and appliances.

Subsequent issues will be the National Summary (Volume II) containing summary data on the final provincial reports and the Special Volume on National Capital Region (Metro Manila Area) which will cover data on the social, economic and demographic characteristics of the region.

Grateful acknowledgment is due the National Census Coordinating Board, government agencies, committees and the local coordinating boards for their invaluable assistance and cooperation.

  
TITO A. MIJARES

# **Explanatory Text**

## **GENERAL**

### **INTRODUCTION**

The National Census and Statistics Office conducted in May 1980, the 1980 Census of Population and Housing. This type of Census was also undertaken in May 1970. In May 1975 the Census of Population was taken as Phase I of the 1975 Integrated Census of the Population and Its Economic Activities. This nationwide undertaking was designed to obtain comprehensive data on the size, distribution, structure, change and socio-economic characteristics of the population and to take inventory of the housing accommodations, their geographic location, structural characteristics, available facilities, etc.

The population report contains data gathered from private households as well as collective households, while data on housing were collected from private households only.

It should be emphasized at this point that a complete enumeration of all households throughout the country was made but only sample household questionnaires representing 20 percent of the listed households were processed and the data published in this volume. In so doing, however, the total population count by barangay, male and female, obtained from the listing sheet taken simultaneously during the enumeration was maintained in computing the weights or expansion factors. It should also be noted that data on Tables 1 to 4 of the population tables refer to total population, that is, the population of the private households plus the collective households while Tables 5 to 10 cover exclusively the private household population.

Pursuant to the provision of Batas Pambansa Bilang 72, a final count of the population, by sex at barangay level was submitted to the President and was approved under Proclamation No. 2170 dated March 12, 1982. This report was published separately in 74 provincial volumes.

### **AUTHORITY FOR THE 1980 CENSUS**

Under Commonwealth Act No. 591, the National Census and Statistics Office is authorized "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

It may be mentioned in this regard that sometime in February 1980 Parliamentary Bill No. 809 was presented at the Batasang Pambansa, providing for the taking of an integrated census every ten years beginning 1980, with May 1 of every census year as the reference date. This bill was approved into Batas Pambansa Bilang 72 on June 11, 1980, more than one month after the start of enumeration.

### **INTER-AGENCY PARTICIPATION**

The expertise and technical advice of the National Economic and Development Authority Inter-Agency Committee on Population and Vital Statistics and its Technical Working Group on 1980 Census of Population and Housing played a vital role in the successful undertaking of the census.

The Committee's main function was to review the questionnaire, methodologies, concept, tabulation and other related aspects of the census in the production of data and development of systems that would produce more reliable and accurate result. It had for its chairman the Dean of the University of the Philippines Population Institute (UPPI) and for its members, one representative each from the Ministries of Human Settlements (MHS), National Defense (MND), Education and Culture (MEC), Health (MOH) and Local

## EXPLANATORY TEXT

Government and Community Development (MLGCD); the Commission on Population (POPCOM); National Economic and Development Authority (NEDA); and two representatives from the National Census and Statistics Office (NCSO). The Technical Working Group (TWG) for the 1980 Census of Population and Housing was headed by the Chief of the National Census and Household Surveys Department of NCSO and the members were representatives from the MHS, EPRS-NEDA, SCO-NEDA, POPCOM, UPPI, MOH, MEC, and the National Housing Authority (NHA).

Recommendations were likewise solicited from other government agencies for questions that should possibly be included in the population and housing portions in order to fill their data needs.

As early as August 1977, an NCSO Technical Committee for censuses was created. Ranking officials of the National Census and Statistics Office comprised the committee, with the Assistant Executive Director as Chairman, the Chief of the National Census and Household Surveys Department (NCHSD) as Vice-Chairman and Heads of six other departments and staff offices as members.

The committee coordinated with the Inter-Agency Committee and TWG of the NEDA on the technical aspect of the census and rendered a monthly progress report to the Executive Director. It provided the overall direction of the activities of the different subcommittees on census. The two subcommittees created, the Sub-Committee on Population and Housing Census and the Sub-Committee on Operations and Logistics Support, were directly charged with the preparatory work for the census undertaking.

## CENSUS BOARDS

A systematized involvement of government agencies and instrumentalities was made possible largely through the concerted efforts of the members of the National Census Coordinating Board (NCCB) and the Provincial, City and Municipal Census Boards. The national board was created by NEDA Memorandum Order No. 4-80, dated April, 1980 and the local boards, by Memo Order No. 5-80, dated April 1, 1980, by virtue of the powers vested in the Minister of Economic Planning under Section 3 of Presidential Decree No. 1200.

The NCCB was headed by the Minister of Economic Planning as Chairman with the Executive Director as Executive Officer. Named as members were the Ministers of Agriculture, Budget, Education and Culture, Finance, Human Settlements, Public Works, Justice, Labor, Local Government and Community Development, National Defense, Natural Resources, Public Highways, Public Information and Transportation and Communication. Rules and regulations necessary for the successful undertaking of the census were issued by the Board.

At the local government level, similar functions were carried out by the Provincial City and Municipal Census Boards. The Provincial Governor headed the Provincial Census Board while the Division Superintendent of Schools was Vice-chairman. Members were the Highway District Engineer, Provincial Auditor, Provincial Commander of the Philippine Constabulary, the Provincial Development Officer and the Provincial Agriculturist. The City Census Board was composed of the City Mayor as Chairman; City Superintendent of Schools, Vice-chairman; and the City Engineer, City Assessor and City Development Officer, members. Finally, the Municipal Census Board had for its Chairman the Municipal Mayor and ably assisted by the District Supervisor as Vice-chairman. The members were the Municipal Agriculturist, Station Commander, Municipal Treasurer and the Municipal Development Officer.

## **EXPLANATORY TEXT**

For each of these local census boards, the Provincial Census Officer, City Census Officer and the Municipal Census Officer were designated Executive Officer of their respective Board.

### **CENSUS ORGANIZATION**

The overall direction and instructions for the census undertaking emanated from the Executive Director of the National Census and Statistics Office or in his absence, the Assistant Executive Director.

Assisted by the Task Force from the Central Office and in coordination with the local census boards, the Regional Census Officers and the Provincial Census Officers directly supervised the field operations in their respective areas. The services of District Supervisors, Head Teachers and elementary school teachers from public schools were utilized as City/Municipal Census Supervisors, Team Supervisors and Enumerators in that order.

During the field operations, the 1980 Census Operations Center under the overall supervision of the National Census and Household Surveys Department Chief, was the operating body that monitored the overall operations. Lending support to the center were the Administrative and Fiscal Services Staff.

### **METHOD OF ENUMERATION AND USE OF SAMPLING**

The household was used as the enumeration unit and a complete listing of dwelling units, including vacant ones, was done.

A combination of complete enumeration and sampling was adopted. While all households were asked on the count of the population and housing characteristics, only twenty percent (20%) were asked on other characteristics. The selection of sample households was done systematically with a random start from a listing of households which was prepared simultaneously with the enumeration.

Using PH Form 2 (Common Private Household Questionnaire) and with an 80 percent coverage, the items asked on population were household membership, relationship to head, line number of mother, sex, date of birth, age as of last birthday and marital status. For the housing items, the type of building and the construction materials of roof and outer walls, number of rooms, floor area of the dwelling unit and the year the building was built were asked.

In addition to the population and housing items just mentioned, additional information were asked using PH Form 3 (Sample Private Household Questionnaire) from the 20 percent samples such as language or dialect generally spoken at home, citizenship, usual residence of mother at person's birth, residence of person in 1975, ability to speak Pilipino and English, school attendance, highest grade completed, literacy, economic activity of the person, place of schooling or work, fertility, nature of occupancy of the dwelling unit and housing facilities and conveniences.

Collective households were enumerated using PH Form 4, where the information asked were the same as those in PH Form 2, excluding housing items.

### **PLACE WHERE ENUMERATED**

All persons were enumerated in their usual place of residence, which is the geographic place (street, barangay, sitio, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he usually sleeps; therefore, it may be the same as or different from the place where he was found at the time of the census.

## EXPLANATORY TEXT

### POST ENUMERATION SURVEY

Originally the plan was to conduct a Post Enumeration Survey covering the whole country. For lack of funds the survey had to be confined to Metro Manila. Its purpose was to determine the extent of underenumeration or overenumeration in the 1980 Census of Population and Housing.

A sample of 132 barangays was selected. However, in 59 barangays which were divided into two or more enumeration areas (EAs), an enumeration area was chosen as sample.

A complete listing was made of households in the sample barangays/EAs using PH Form 1-B. Twenty percent of these households were selected as sample households and interviewed using PH Form 2, which was the same questionnaire used for non-sample households during the main enumeration. The housing portion of this form was disregarded.

### CONTENT AND COVERAGE OF THE PUBLICATION

In this publication, the population and households were described according to the respective items listed below:

Population Items	Housing Items
Age	Type of Building
Sex	Type of Occupancy
Marital Status	Construction Materials of Roof and Outer Walls
Highest Grade Completed	Year Built
Literacy	Floor Area of Dwelling Unit
Language/Dialect Spoken in the Household	Tenure of Owner-Occupant with Respect to the Land
Gainful and Non-Gainful Occupation	Kind of Lighting Facilities
Major and Minor Industry	Use and Source of Water Supply
Migration	Type of Toilet Facilities
	Kind of Cooking Fuel
	Household Appliances

The above items are presented in the ten population tables and nine housing tables of this report.

Except for figures on total population and sex, all other characteristics were based on a 20 percent sample.

Aside from these published tables, 10 other tables on the above characteristics plus 6 statistical tables dealing on ever-married women 15 years old and over are also available to statistical users.

### DEFINITION OF TERMS AND CONCEPTS

#### I – POPULATION

##### BARANGAY

A barangay is the smallest political unit in the country and generally its enumeration is

## EXPLANATORY TEXT

assigned to one enumerator. For enumeration purposes, a large barangay is usually split into parts and each part is called an enumeration area (EA).

### ENUMERATION AREA

An enumeration area (EA) is a delineated area assigned to one enumerator, usually consisting of about 300 households. A barangay or part of a barangay may have been designated as an enumeration area.

### URBAN AND RURAL AREAS

The same concepts used in the 1970 and the 1975 Censuses were followed in classifying areas as urban. According to these concepts, urbanized areas consist of:

1. In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
2. Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
3. Poblaciones or central districts (not included in 1 and 2), regardless of the population size, which have the following:
  - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
  - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
  - c. At least three of the following:
    - 1) A town hall, church or chapel with religious services at least once a month;
    - 2) A public plaza, park or cemetery;
    - 3) A market place or building where trading activities are carried on at least once a week;
    - 4) A public building like a school, hospital, puericulture and health center or library.
4. Barangays having at least 1,000 inhabitants which meet the conditions set forth in 3 above, and where the occupation of the inhabitants is predominantly non-farming or fishing.

All areas not falling under any of the above classifications are considered rural.

### PERSONS ENUMERATED IN A PRIVATE HOUSEHOLD

The following were counted and enumerated as members of the household:

1. Persons whose usual place of residence is the place where the household lives and present at the time of visit of the enumerator, except those born after 12:01 A.M., May 1, 1980;
2. Persons whose usual residence is the place where the enumerated household lives, but temporarily away at the time of enumeration, such as:
  - a. persons temporarily away on vacation, business or pleasure trip or any other purpose in the Philippines who are expected to be back within six months,

## EXPLANATORY TEXT

- or within one year, if abroad;
  - b. students who usually go home to their respective households at least once a week;
  - c. persons working elsewhere who usually go home to their respective households at least once a week;
  - d. patients confined in hospitals for not more than six months at the time of enumeration of the household, except those confined (1) as inmates (not patients in wards for temporary confinement) in tuberculosis pavilions; (2) in mental hospitals; (3) in leprosaria or leper colonies; and (4) in rehabilitation centers for drug addicts;
  - e. trainees in the Armed Forces of the Philippines, if their training is not more than six months;
  - f. convicts and detainees in provincial or municipal/city jails or military camps, who have been confined for not more than 6 months at the time of enumeration of the household, except those who have been sentenced for more than 6 months (including those whose sentence is on appeal), even though just confined; and
  - g. officers and crew members of coastal, interisland, or fishing vessels; officers and crew members of ocean-going vessels who usually go home to their household at least once a year.
3. Boarders of the household who are working, looking for work or studying, and who do not go home at least once a week;
  4. Employees of household-operated enterprises who eat and sleep with the household and who do not go home at least once a week;
  5. Persons (other than those in "3" and "4") whose usual place of residence is elsewhere, but who have been away from their usual place of residence for more than 6 months;
  6. Members of the Armed Forces of the Philippines including draftees, sleeping most of the nights with the household, except those who only board or lodge with the household and who usually go home at least once a week; in such a case, they will be enumerated in their own household;
  7. Persons found in the household who have no usual place of residence elsewhere;
  8. Persons found in the household who are not certain of being enumerated elsewhere;
  9. Persons who consider the dwelling unit of the household as their usual place of residence but are living within the premises of a foreign embassy, ministry, legation or consulate, including non-Filipino employees who have been residents of the Philippines before such employment;
  10. Citizens of foreign countries and Filipinos (balikbayan) who have resided or expect to reside in the Philippines for more than one year from arrival;
  11. Persons who sleep in the same dwelling unit but may not be able to take all or some of their meals with the household because of the nature of their work or other similar reason (they take their meals at place of work, etc.), should be considered as part of the household; and
  12. A household member who is alive as of 12:01 A.M., May 1, 1980, but dies prior to the enumeration of the household.

## EXPLANATORY TEXT

### PERSONS TOTALLY EXCLUDED FROM THE ENUMERATION

Totally excluded from the population count of the Philippines were:

1. Foreign ambassadors, ministers, consuls or other diplomatic representatives, and members of their households (except Filipino employees and non-Filipino employees who had been residents of the Philippines prior to said employment);
2. Citizens of foreign countries living within the premises of an embassy, legation, chancellory or consulate;
3. Officers and enlisted men of U.S. Military or Naval Forces and non-Filipino members of their households, irrespective of residence; foreigners who are civilian employees in U.S. military or naval stations and member of their families living within the premises of said stations or reservation; (Note: for foreigners who are civilian employees of said stations living outside the station or reservation, see Item 5).
4. Citizens of foreign countries who are Chiefs and officials of international organizations like UN, ILO or USAID, who are subject to reassignment to other countries after their tour of duty in the Philippines, and members of their families;
5. Citizens of foreign countries together with non-Filipino members of their families, who are students or who are employed, or have business in the Philippines and have been in the Philippines or expect to stay in the country for one year or less from arrival;
6. Citizens of foreign countries and Filipinos with usual place of residence in a foreign country, who are visiting in the Philippines and expect to stay in the country for one year or less from arrival (e.g. a *balikbayan* who will return to his usual place of residence abroad after a short vacation or visit in the Philippines);
7. Citizens of foreign countries in refugee camps/vessels; and
8. Residents of the Philippines on vacation, pleasure or business trip, etc. abroad, who have been away or expected to be away from the Philippines for more than one year from departure.

### USUAL PLACE OF RESIDENCE

The term refers to the geographic place (street, sitio, barrio/barangay, municipality or province) where the enumerated person usually resides. As a rule, it is the place where he sleeps most of the time; hence, it may be the same as or different from the place where he was found at the time of the census.

### HOUSEHOLD

A household usually consists of a group of persons who sleep in the same dwelling unit and have common arrangements for the preparation and consumption of food. A person who lives alone is considered as one separate household. Although in most cases a household consists of a related family group, some household members may have no relationship to the central group. Boarders and servants, for instance are counted as part of a particular household if they take their meals with the household and sleep in the same dwelling unit. Persons who sleep with a household but individually cook their meals or eat elsewhere are each considered as single-person household.

## **EXPLANATORY TEXT**

Three generations may be living in one dwelling unit. If they are divided into two or more groups whose eating arrangements are independent from each other, each group is counted as a separate household.

### **PERSONS NOT LIVING IN HOUSEHOLD**

Falling under this category are persons living in collective living quarters such as welfare institutions (orphanages and homes for the aged or infirm); penal and corrective institutions (jails, national penitentiary, and reformatory institutions); hospitals, sanatoria, leprosaria, and nurses homes; dormitories and boarding schools; lodging houses such as hotels, tourist homes and the like; military camps and others.

Most of these institutions house inmates for whom care or custody is provided by resident staff members, or persons residing in group quarters or in housing units on the institutional grounds.

Private families living within such institutions, however, are excluded from the classification, as well as persons (employees, students, etc.) who go home to their families on weekends or days off. Persons found in lodging houses, but who are on vacation or business trips and whose absence from home does not exceed six months on the day of enumeration, are likewise not counted as part of the institutional population.

### **RESPONDENT**

A respondent is any responsible adult member of the household who furnished the information or answers to questions during the interview.

### **LANGUAGE/DIALECT GENERALLY SPOKEN IN THE HOUSEHOLD**

This refers to the language or dialect spoken most of the time by members of the household. In cases where two or more languages/dialects are spoken by household members, the one most often used in conversations among members of the family of the head when most of them are gathered together is considered as the language/dialect generally spoken in the household.

### **HEAD OF HOUSEHOLD**

The person responsible for the care and organization of the household is generally considered as the head of the household. He usually provides the chief source of income for the household.

In the case of a household consisting of two or more unrelated persons sharing a dwelling unit and sharing the same cooking facilities and meals, the head is usually the eldest male or female in the group regarded as such by the other members.

### **RELATIONSHIP TO HEAD OF HOUSEHOLD**

This determines how each household member is related to the head, who is usually the husband or father, although in his absence or if incapacitated, the wife may be designated as head.

1. Spouse — a woman/man married to and living with the head. This includes legal marriages as well as common-law relationships.
2. Son/daughter — the head's own child, stepchild, or adopted child.

## EXPLANATORY TEXT

3. Son-in-law/daughter-in-law – refers to a household member related to the head by marriage to his daughter or son.
4. Grandson/granddaughter – child of the son or daughter of the head.
5. Other relative – a household member related to the head by blood, marriage, or adoption. Father, mother, aunts, nephews, parents-in-law and cousins are examples.
6. Others – any person in the household who is usually a non-relative of the head. Boarders and servants fall under this category. Certain members of the household who are related to the head by blood or affinity, but are actually boarders or servants in the household, are classified under "Others".

For collective households and group quarters, the question on relationship refers to the person's relationship to the institution or establishment, and not to the person recorded as head.

## AGE AND DATE OF BIRTH

Data on the age of the population were obtained by asking the respondent the month and year of birth and the age itself of the household member before May 1, 1980. To ensure accuracy, a conversion table on age before May 1, 1980 was prepared for the use of enumerators, editors/coders and verifiers.

## MARITAL STATUS

This refers to the civil status of all persons 10 years old and over. A person in this age group is classified as single, married, widowed, separated or divorced, or civil status unknown, based on the following definitions:

- a. Single – If never been married.
- b. Married – Legally married or living consensually with husband/wife without benefit of a legal marriage. A person classified as "married" includes one who remarried after having been widowed, separated or divorced or one temporarily separated from spouse owing to the nature of work, illness or service in the Armed Forces.
- c. Widowed – A person whose spouse died and who has not remarried at the time of enumeration.
- d. Separated – If permanently separated from spouse either legally or otherwise, due to marital discord.
- e. Divorced – If bond of matrimony has been dissolved through a court decree and is therefore free to remarry.
- f. Unknown – If civil or marital status is either not known to the respondent, or the respondent himself refuses to reveal the marital status of such person.

## CITIZENSHIP

Citizenship is defined as the legal nationality of a person. A citizen is a legal national of the country of the census; an alien is a non-national of the country.

## LITERACY

A person is considered literate if he is able to read and write a simple message in any language or dialect.

## **EXPLANATORY TEXT**

### **HIGHEST GRADE COMPLETED**

This has reference to the specific grade or year completed in elementary school, high school, college or university, by persons 7 years of age and over. Academic degree holders are classified according to the title of the degree received or the major field of study undertaken.

### **USUAL OCCUPATION**

This refers to the specific job or kind of work that a person, who works most of the year, is usually pursuing, or if unemployed at the time of enumeration, it is the kind of work he used to do most of the year. A person is considered as usually working most of the year if he works for at least 10 hours a week for 26 weeks either for pay in cash or in kind, for a fee or profit in own farm, business or establishment or practice of a profession and without pay on family farm or enterprise. This particular group of workers is referred to as gainful workers.

For persons who do not work most of the year, the usual occupation relates to the non-gainful activities they usually do most of the year. Among such persons are housekeepers, students, pensioners, retired and disabled. However, a person who is housekeeping or schooling and also works in a gainful activity was reported as gainfully employed, even if more time was spent housekeeping or studying, as the case may be.

### **INDUSTRY**

Industry refers to the specific character and nature of business or industry or the place where the work is being performed in connection with the job or occupation reported for a person.

### **EVER-MARRIED WOMAN**

This refers to a woman who has already entered married life. Marriage here may either be legal or consensual union. At the time of enumeration the ever-married woman may still be married, or already widowed, separated or divorced.

## **II – HOUSING**

### **BUILDING**

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls with adjacent building which usually extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another. A building therefore, is any structure intended for dwelling, storage, factory, shelter or for some other useful purposes.

For purposes of the 1980 Census of Population and Housing, only the following buildings were listed and assigned building serial numbers:

- a. A house or any kind of building or shelter where people were actually living;
- b. A residential building (house, apartment or accessoria, condominium) that was vacant;

## EXPLANATORY TEXT

- c. Hotel, motel, lodging house, dormitory or camp (construction, logging, mining, etc.) in operation;
- d. A commercial, office, industrial, agricultural or other kinds of buildings with one or more dwelling units (containing a kitchen/kitchen-dining room, living room and a bedroom, and with separate entrance) which were all vacant.

The different types of buildings are:

1. Single house — a complete structure intended for one household. It includes the so-called “nipa hut” or a small house that is built as a more or less permanent dwelling unit.
2. Duplex — a structure intended for two households, with complete living facilities for each. It is divided either vertically or horizontally into two separate dwelling units which are usually identical.
3. Apartment/accesoria/condominium/row house

An apartment is a structure usually of several stories, made up of three or more independent entrances from internal halls or courts. It differs from an accesoria in that an apartment has one common entrance from the outside.

An accesoria is usually a one or two-floor structure divided into three or more dwelling units, each dwelling unit having its own separate entrance from the outside. Another name for accesoria is row house.

A condominium is usually a high-rise building where the dwelling units are owned individually but the land and other areas and facilities are owned in common.

4. Improvised (barong-barong) — a makeshift or roughly constructed house usually built with salvaged materials.
5. Commercial/industrial/agricultural — buildings not intended for human habitation but used as dwelling units at the time of the census.

Commercial — a building used for transacting business or rendering professional services, such as a storage or an office building.

Industrial — a building used for processing, assembling, fabricating, finishing, manufacturing or packaging operations, such as a factory or a plant.

Agricultural — any structure used for agricultural purposes, such as a barn, warehouse, rice mill, etc.

6. Other housing unit (natural shelter, boat, etc.)

This refers to living quarters which are not intended for human habitation nor located in permanent buildings but which are, nevertheless, used as living quarters at the time of the census. Caves, other natural shelters and mobile housing units such as trailer, barge, boat, etc., fall within this category.

7. Hotel, lodging house, dormitory, etc. — This group comprises permanent structures which provide lodging and/or meals on fee basis. Hotels, motels, inns, boarding houses, dormitories, pensions and lodging houses fall within this category.
8. Institutional (hospital/convent/school dormitory/penal institution, etc.) — a building intended for persons confined to receive medical, charitable, or other care treatment such as jails and penal colonies, and other buildings like convents, school dormitories, etc.
9. Other collective living quarters — any structure or shelter which does not fall under items 7 and 8. Included in this category are camps which are defined sets of

## **EXPLANATORY TEXT**

premises originally intended for the temporary accommodation of persons with common activities or interests like military camps, and other camps established for the housing of workers in mining, agriculture, public works or other types of enterprises.

### **DWELLING UNIT**

A dwelling unit is a separate and independent place of abode intended for habitation by one household, or one not intended for habitation but occupied as living quarters by a household at the time of the census.

Dwelling units counted included those that are occupied and those that are unoccupied.

### **CONSTRUCTION MATERIALS OF ROOF**

The kinds of materials used are as follows:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Asbestos
4. Cogon/nipa
5. Makeshift/salvaged materials
6. Others (anahaw, etc.)

### **CONSTRUCTION MATERIALS OF OUTER WALLS**

The kinds of materials may be any of the following:

1. Galvanized iron/aluminum
2. Tile/concrete/brick/stone
3. Wood/plywood
4. Mixed tile/concrete/brick/stone and wood/plywood
5. Asbestos
6. Bamboo/sawali
7. Cogon/nipa
8. Makeshift/salvaged materials
9. Others (anahaw, etc.)

If the roof or outer walls are constructed of two or more materials the material most used was reported.

### **YEAR BUILDING WAS BUILT**

This refers to the year when the extent of construction permitted occupancy for living purposes. The year reported was the particular year when the occupancy started or when the building was fit for occupancy even if not occupied.

### **NUMBER OF ROOMS IN THE DWELLING UNIT**

A room is defined as a space in a dwelling unit or other living quarters enclosed by walls reaching from the floor to the ceiling or roof covering, or at least to a height of 1.8 meters which are of permanent or semi-permanent structure, of a size large enough to hold a bed for an adult or at least has an area of 3 square meters.

## **EXPLANATORY TEXT**

The total number of rooms reported included the bedrooms, dining room, living room, kitchen, roofed veranda, library or music room and other separate spaces used or intended for dwelling purposes, as long as they meet the criteria of walls and floor space. Passageways, lobbies, bathrooms and toilets or rooms used exclusively as store/shop/clinic/grains storage (nobody sleeps therein) were not counted as rooms even if they meet the criteria.

## **FLOOR AREA OF DWELLING UNIT**

This refers to the space enclosed by the exterior walls of the dwelling unit, or the space measured inside the outer walls of the spaces that are counted as rooms. In case of several floors, the area of each floor in square meters was taken and added together to get the total floor area of the dwelling unit. Areas of floor spaces that are not considered rooms such as bathroom, toilet, storeroom, passageway were excluded in determining the floor area.

## Palawan: A Brief Analysis

Palawan lies approximately 672 kilometers southwest of Manila, reclining between Mindoro and Borneo and is the southwest frontier with Malaysia. It is bounded on the east by the Sulu Sea and on the west by the South China Sea. The southern tip of the province is only 97 kilometers away from Sabah.

A chain of tall mountains centrally runs its entire length thus dividing the mainland of Palawan into east and west coasts. The mountain ranges average 1,068 meters high with its highest peak, Mt. Mantalingahan in the south at 2,074 meters. Except for the wide plain in the north and pockets of big valleys and delta land along the shore down to the south, the west coast is practically devoid of coastal land and consists mainly of craggy foothills and mountains close to the sea. Rivers and streams abound throughout the province, but the most unusual which is now a major tourist attraction, is the seven-kilometer underground river flowing under limestone rocks and emptying into Saint Paul Bay.

The province is very rich in natural resources, foremost of which is the black gold. The discovery of oil in the seabeds of Palawan is a national jubilation. Minerals abound in the province, nickel ore being its principal export apart from round logs. Bottling companies use Palawan silicon sand extracted from its vast coastline. The fish that Metro Manilans eat mostly come from the 178 fishing grounds of the province.

The largest province of the country today, Palawan has a total land area of 14,896.3 square kilometers, representing 4.96 percent of the total land area of the Philippine territory. It is composed of 1,768 islands and islets, and is 650 kilometers long with a total coastline of 1,959 kilometers. The biggest island is the mainland of Palawan which is 425 kilometers long, 40 kilometers at its widest at Brooke's Point and 8.5 kilometers at its narrowest at Bahile, Puerto Princesa City. The province is presently composed of 20 municipalities and one city. The smallest and newest is the municipality of Kalayaan which was created by virtue of Presidential Decree No. 1596 dated June 11, 1978. Puerto Princesa City is the capital of Palawan and serves as the chief seaport of the province.

## A BRIEF ANALYSIS

### POPULATION

As of May 1, 1980, Palawan had a total population of 371,782. Over the five years between the 1980 census and the quinquennial census on May 1, 1975, Palawan's population grew by 71,717 or 23.90 percent. This was one of the fastest absolute increases to be posted by any province during the most recent intercensal period, although its annual geometric growth rate of 4.38 percent from 1975 to 1980 was slightly lower than the 1970-1975 rate of 4.87 percent. Much of the recent rise of the population size is attributable to Puerto Princesa City. Averaging a yearly growth rate of 5.67 percent, the city's population expanded from 45,709 in 1975 to 60,234 in 1980 or by 14,525 – a little over one-fifth of the whole absolute increase of the provincial population. Despite Puerto Princesa's sharp growth rate, the increase in the population density for the province during the past five years was only modest, from 20.1 to 25.0 persons per square kilometer, the most sparsely populated among the 73 provinces.

The rural population is more than three times as large as the urban population – 287,893 versus 83,889. As shown in Table A, the proportion of urban population rose by as much as 4.04 percentage points (from 18.53% to 22.57%) during the 1975-1980 intercensal period, after losing by 1.13 percentage points between 1970 and 1975. Consequently, a corresponding rise and fall of the rural population during the censal years under review was noted. From 80.34 percent in 1970, the rural ratio rose slightly to 81.47 percent and then fell to 77.43 percent in the latest census. Majority or 53.61 percent of the population are males, 12.08 percent of whom are urban dwellers and 41.53 percent, rural residents. Females constitute the remaining 46.39 percent, 10.49 percent coming from urban areas and 35.90 percent, from rural areas.

**TABLE A – URBAN-RURAL POPULATION BY SEX,  
PALAWAN: 1970, 1975 AND 1980**

Area Classification and Sex	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>371,782</u>	<u>100.00</u>	<u>300,055</u>	<u>100.00</u>	<u>236,635</u>	<u>100.00</u>
Male	199,317	53.61	158,628	52.87	123,962	52.38
Female	172,465	46.39	141,437	47.13	112,673	47.62
Urban	<u>83,889</u>	<u>22.57</u>	<u>55,611</u>	<u>18.53</u>	<u>46,521</u>	<u>19.66</u>

Female	38,985	10.49	25,754	8.58	22,761	9.62
Rural	<u>287,893</u>	<u>77.43</u>	<u>244,454</u>	<u>81.47</u>	<u>190,114</u>	<u>80.34</u>
Male	154,413	41.53	128,771	42.92	100,202	42.34
Female	133,480	35.90	115,683	38.55	89,912	38.00

## A BRIEF ANALYSIS

As can be gleaned from the foregoing table, over the decade the males had constantly outnumbered the females with sex ratios becoming more pronounced at 110.02 in 1970, 112.15 in 1975 and 115.57 in 1980. Males likewise dominated in both the urban and rural areas. The urban population posted sex ratios of 104.39 in 1970, 115.93 in 1975 and 115.18 in 1980 and the rural population, 111.44, 111.31 and 115.68, also in the same order.

The diagram of the age-sex composition of the urban and rural population is shown in Figure 1. Each bar in the diagram represents the proportion to the total population of males or females, urban or rural, in five-year age groups. The bars corresponding to the rural males and females continuously shorten as the group becomes older. In contrast, the urban population show slight deviations as the males 25 to 29 years old exceed those in the age groups 15-19 and 20-24 years. Moreover, urban females 60-64 years old exceed the 55-59 year-old group.

## A BRIEF ANALYSIS

### AGE COMPOSITION

More than two-fifths (42.32%) of the total population are 0-14 years of age; 55.36 percent, 15-64; and 2.32 percent, 65 years and over. Compared with the figures of the 1970 and 1975 censuses, the proportion of persons below 15 years old sustained a downward pattern – from 44.85 percent in 1970 to 44.68 percent in 1975 and finally to its present ratio of 42.32 percent. Persons of productive ages, anywhere from 15-64 years, push their proportion up by 2.07 percentage points from 1975, greater than the 0.23 percentage-point increase from 1970 to 1975. The slight growth of 0.29 percentage point in 1975-1980 for adults 65 years of age and over is more than enough to compensate for the 0.06 percentage-point decrease in 1970-1975.

**TABLE B – AGE COMPOSITION OF THE POPULATION,  
PALAWAN: 1970, 1975 AND 1980**

Age Composition	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>371,782</u>	<u>100.00</u>	<u>300,065</u>	<u>100.00</u>	<u>236,635</u>	<u>100.00</u>
0-14 years	157,331	42.32	134,064	44.68	106,137	44.85
15-64 years	205,828	55.36	159,893	53.29	125,560	53.06
65 years and over	8,623	2.32	6,108	2.03	4,938	2.09

Wide variations in the age structure, particularly for the two younger broad age groups, occur between the urban and rural population. Of all urban residents, 40.16 percent are 0-14 years old; 57.40 percent, 15-64; and 2.44 percent, 65 and over. The corresponding proportions for the rural population are 42.95 percent, 54.77 percent, and 2.28 percent, respectively.

Dependency ratio (number of dependents for every 100 persons in the productive age group) as a whole decreased from 87.67 in 1975 to 80.63 in 1980 as a result of the increased percentage of persons 15-64 years old. Urban dependency ratio was considerably lower than that of the rural population – 74.23 against 82.58.

### MARITAL STATUS

In the three censal periods, 1970, 1975 and 1980, the population 10 years of age and older were mostly married persons. The proportion for 1975 had increased by a mere 0.01 percentage point over the 1970 figure, and in 1980, by 2.22 percentage points over the former period. Constituting 42.45 percent, never married persons fell even below the 1970 level. After decreasing in 1970-1975, the proportion of the widowed and those divorced or

## A BRIEF ANALYSIS

separated increased in 1975-1980 to 3.60 and 0.53 percent, respectively. Only 0.09 percent did not bare their marital status.

The contrast between single and married persons was especially sharp among the females. While the married made up 56.51 percent, those never married comprised 37.76 percent of the females. For the males, 50.68 percent were married and 46.36 percent were single. Barely 2.44 percent among the males were widowed and 0.44 percent were divorced or separated. The corresponding proportions for the females were markedly higher at 5.01 and 0.63 percent, respectively.

Shown below is the distribution of all persons 10 years of age and older, by sex and marital status since 1970:

**TABLE C – POPULATION 10 YEARS OLD AND OVER  
BY SEX AND MARITAL STATUS, PALAWAN:  
1970, 1975 AND 1980**

Sex and Marital Status	1980		1975		1970

## A BRIEF ANALYSIS

### HIGHEST GRADE COMPLETED

In 1980, fewer people at least 7 years old had not completed any grade as their proportion to the private household population 7 years of age and older dropped over the past five years from 15.85 to 12.31 percent. Persons schooled no higher than the elementary level in 1980 was still the most numerous (63.02%) but the rate of growth of their population from 1975 to 1980 was considerably outpaced by each of the rates of growth of those

## A BRIEF ANALYSIS

who had reached as far as high school, college and even of academic degree holders. As a result, the proportion of those with elementary training slightly increased over the past five years, from 62.74 to 63.02 percent. That of persons attaining high school posted an increase from 14.21 to 17.94 percent. So did the proportion of those who had attended college, from 2.76 to 4.28 percent, as well as that of academic degree holders, from 1.55 to 2.27 percent. Only 0.18 percent in 1980 did not state their educational attainment.

The table below gives the distribution of the private household population 7 years old and over by highest grade completed in 1975 and 1980:

**TABLE D – PRIVATE HOUSEHOLD POPULATION 7 YEARS OLD  
AND OVER BY HIGHEST GRADE COMPLETED,  
PALAWAN: 1975 AND 1980**

Highest Grade Completed	1980		1975	
	Number	Percent	Number	Percent
Total	<u>274,669</u>	<u>100.00</u>	<u>231,161</u>	<u>100.00</u>
No grade completed	33,814	12.31	36,635	15.85
Elementary	173,092	63.02	145,036	62.74
High school	49,270	17.94	32,846	14.21
College	11,766	4.28	6,370	2.76
Academic degree holder	6,235	2.27	3,584	1.55
Not stated	492	0.18	6,690	2.89

The elementary-educated population was composed mostly of those who completed the first to third grades (35.77%), followed by persons who had completed the sixth or seventh grade (33.89%). Those who had reached fourth grade and fifth grade made up, respectively, 18.09 and 12.25 percent. Persons who finished first to third year comprised more than three-fifths of all those with high school education (63.78%); secondary level graduates numbered 36.22 percent. More than eighty percent of the college undergraduates completed the first to third year (83.43%) and only 16.57 percent, fourth year or higher.

## A BRIEF ANALYSIS

## LITERACY

The rate of literacy for the private household population 10 years of age and older was 77.10 percent. Urban areas (90.12%) registered a much higher rate than rural areas (73.32%).

The male literacy rate (78.23%) was higher than that posted by the females (75.88%). It was observed that urban females had a higher rate of literacy than males (90.32% against 89.92%) while rural males (74.94%) registered a rate higher than that for the rural females (71.54%).

## A BRIEF ANALYSIS

### LANGUAGE AND DIALECT

Palawan has a long list of diverse languages and dialects without one being generally spoken by a majority of the private households. Tagalog, with not even a third of all households generally using it (28.20%) and Cuyono, with 26.10 percent are the media of communication most commonly used. Rounding out the top five are: Pinalawan (11.23%), Hiligaynon or Ilongo (9.54%), and Tagbanua (3.16%).

Tagalog is generally spoken by 56.88 percent of the urban households, followed by Cuyono, 23.25 percent. On the other hand, the rural households do not have any major language or dialect, but Cuyono leads with 26.86 percent, followed by Tagalog, 20.58 percent; Pinalawan, 14.16 percent and Hiligaynon (Ilongo), 11.03 percent.

## A BRIEF ANALYSIS

### GAINFUL OCCUPATION

The province of Palawan has 105,260 gainful workers 15 years of age and older in 1980. This number is 20.57 percent higher than in 1975, and 33.34 percent more than the 1970 figure. Males account for a large majority of the total gainful employment (85.29%); only 14.71 percent are females.

Agricultural, animal husbandry and forestry workers, fishermen and hunters comprise the largest occupation group, but their proportion declined from 78.19 percent in 1975 to 74.09 percent in 1980, even lower than that of 1970 (75.82%). Clerical workers had a steady rise since 1970, from 1.44 percent to 1.67 percent in 1975 and 2.26 percent during the most recent censal period. Although the proportion of professional, technical and related workers, service workers, and production and related workers, transport equipment operators and laborers declined from 1970-1975, these groups increased moderately in 1980 by 0.99, 1.57 and 1.37 percentage points, respectively. Administrative, executive and managerial workers, sales workers and agricultural, animal husbandry and forestry workers, fishermen and hunters, show another trend. The gain attained in 1975 by the three groups was followed by a fall in 1980 by 0.37, 0.30 and 4.10 percentage points, in the same order. Merely 0.68 percent are workers with unclassifiable occupation.

The breakdown of all gainful workers at least 15 years old by major occupation group since 1970 is presented below:

**TABLE E – GAINFUL WORKERS 15 YEARS OLD AND OVER  
BY MAJOR OCCUPATION GROUP, PALAWAN:  
1970, 1975 AND 1980**

Major Occupation Group	1980		1975		1970	
	Number	Percent	Number	Percent	Number	Percent
Total	<u>105,260</u>	<u>100.00</u>	<u>87,300</u>	<u>100.00</u>	<u>78,943</u>	<u>100.00</u>
Professional, technical and related workers	4,781	4.54	3,097	3.55	3,052	3.87
Administrative, executive and managerial workers	293	0.28	572	0.65	480	0.61
Clerical and related workers	2,375	2.26	1,462	1.67	1,134	1.44
Sales workers	3,288	3.12	2,988	3.42	1,706	2.16
Service workers	5,582	5.30	3,255	3.73	3,375	4.27
Agricultural, animal husbandry and forestry workers, fishermen and hunters	77,981	74.09	68,257	78.19	59,853	75.82
Production and related workers, transport equipment operators and laborers	10,246	9.73	7,295	8.36	8,625	10.92
Workers not classifiable by occupation	714	0.68	374	0.43	718	0.91

## A BRIEF ANALYSIS

## INDUSTRY

Among the major industry groups, agriculture, fishery and forestry employ close to three-fourths of all gainful workers (74.79%). Community, social and personal services follow distantly with its 11.50 percent working force. Activities not adequately defined comprise only 0.58 percent. The remaining 13.13 percent are distributed among the other industry groups as follows: wholesale and retail trade, 3.14 percent; manufacturing, 3.22 percent; transportation, storage and communication, 2.27 percent; construction, 2.22 percent; mining and quarrying, 1.11 percent; financing, insurance, real estate and business services, 0.97 percent and electricity, gas and water, 0.20 percent. A great majority of workers under agriculture, fishery and forestry are agricultural crop producers (80.22%). Workers under community, social and personal services tend to concentrate in three fields: personal and

## A BRIEF ANALYSIS

household services (33.91%), education services (27.35%) and public administration and defense (24.14%).

## MIGRATION

Of the 296,590 private household population five years old and over, 90.89 percent reported that the city or municipality where they were enumerated in 1980 was also their place of residence on May 1, 1975; 4.84 percent lived previously in Puerto Princesa City or in another municipality of Palawan; 4.15 percent came from another province and 0.12 percent were migrants from foreign countries.

## A BRIEF ANALYSIS

Not only were the proportions of males and females who had a different place of residence in 1975 almost equal, but their backgrounds of previous residence were also nearly identical. Of the males, 4.91 percent had earlier lived in Puerto Princesa City or in another municipality of Palawan; 4.37 percent, in another province; and 0.11 percent, in a foreign country. The corresponding proportions for females were 4.76 percent, 3.91 percent and 0.14 percent, respectively. Majority of these migrants transferred to rural areas (74.63%).

### TYPE OF BUILDING

Single house type is the abode of nearly all households in Palawan (95.55%). Only 1.87 percent and 1.72 percent, respectively, live in duplex and improvised (barong-barong) structures, while even smaller proportions (0.86%) are housed in buildings of other types. The proportion of households in the urban areas sheltered in single houses (91.73%) is a little less than that in the rural areas (96.57%). Only 4.27 percent of the urban households are occupying duplex type, while merely 1.23 percent of the rural households live in the same type of structure.

The following table records the number and proportion of households sheltered in the different types of buildings in 1970 and 1980:

**TABLE F -- NUMBER OF HOUSEHOLDS IN OCCUPIED DWELLING UNITS  
BY TYPE OF BUILDING, PALAWAN: 1970 AND 1980**

Type of Building	1980		1970	
	Number	Percent	Number	Percent
Total	<u>67,649</u>	<u>100.00</u>	<u>43,470</u>	<u>100.00</u>
Single house	64,640	95.55	38,847	89.36

## A BRIEF ANALYSIS

### TYPE OF OCCUPANCY

Of the 67,649 total households in the province, 89.79 percent own the dwelling units where they reside. Only a few are free renters (6.35%); tenants/lessees (3.75%); and subtenants/sublessees (0.11%).

Majority of the urban households are unit owners (78.17%); 11.37 percent, tenants/lessees; 10.25 percent, free renters; and a mere 0.21 percent, subtenants/sublessees. The corresponding proportions for rural households are 92.87, 1.73, 5.32, and 0.08 percent, respectively.

### CONSTRUCTION MATERIALS OF ROOF AND OUTER WALLS

Cogon or nipa, the most commonly used roofing material in both urban and rural areas, cover dwelling units sheltering 80.98 percent of all households; galvanized iron/aluminum, 12.62 percent; asbestos, 0.67 percent; tile/concrete/brick/stone, 0.36 percent; makeshift/salvaged materials, 0.10 percent; and other materials such as anahaw (5.27 percent). More than four-fifths of the rural households live in units with cogon/nipa roofs (88.55%), far larger than the 71.28 percent of the urban households.

Nearly nine out of ten households (87.80%) are in units with exterior walls of light materials such as bamboo or sawali (61.28%), cogon or nipa (23.21%), makeshift or salvaged materials (0.24%) and others like anahaw (3.07%). Compared with 78.00 percent among urban households, 90.41 percent of rural households are occupying units with such walls. Households with units of strong outer walls comprise 12.20 percent. This proportion is distributed as follows: wood or plywood, 5.85 percent; mixed tile/concrete/brick/stone and wood/plywood, 4.71 percent; tile/concrete/brick/stone, 1.28 percent; galvanized iron/aluminum, 0.26 percent and asbestos, 0.10 percent.

### YEAR BUILT

Over four-fifths of the households (82.55%) occupy structures erected within the last ten years, 1971-1980; 11.80 percent, 1961-1970; 3.93 percent, 1951-1960; 0.94 percent, 1942-1950; and 0.78 percent, 1941 or earlier.

In the urban areas, 69.01 percent live in structures built in 1971-1980; 19.07 percent, 1961-1970; 8.07 percent, 1951-1960; 1.96 percent, 1942-1950; and 1.89 percent, 1941 or earlier. The corresponding figures for the rural areas are: 86.15, 9.87, 2.83, 0.67 and 0.48 percent, respectively. Variation in the proportion of households by year built between urban and rural areas was sharpest in 1961-1970 and 1971-1980 built structures.

### FLOOR AREA OF DWELLING UNIT

Almost three-fourths (71.40%) of all households occupy dwelling units having a floor area of less than 30 square meters; 22.90 percent, 30-49; 2.99 percent, 50-69; 1.44 percent, 70-99 and 1.27 percent, 100 square meters and over.

There is a marked difference between the urban and rural areas in the distribution of households by floor area. Of the total urban households, 61.98 percent live in units less than 30 square meters; 24.04 percent, 30-49 square meters; 6.52 percent, 50-69; 3.77 percent, 70-99; and 3.69 percent, 100 or more. The respective proportions for rural households are: 73.91; 22.59; 2.05; 0.82; and 0.63 percent.

## **A BRIEF ANALYSIS**

### **TENURE OF OWNER-OCCUPANT WITH RESPECT TO THE LAND**

Of all households occupying their dwelling units as owners, 73.62 percent also own the land occupied by their abodes; 5.48 percent either lease or sublease it and 3.21 percent are either farm lessees or agricultural tenants. Those enjoying other legal tenure constitute 4.99 percent and those without any, like squatters, 12.70 percent. The rate of lot ownership reach 57.07 percent in urban areas, much less than the 77.32 percent in the rural areas. Over one-fifth have no tenure at all in the former areas (20.51%), compared with more than one-tenth in the latter (10.95%).

### **SOURCE AND USE OF WATER SUPPLY**

The dug well system supplies more than half of all households for each of the three uses of water considered in the 1980 census. This source provides water for drinking to 54.84 percent of all households, for kitchen use to 56.45 percent, and for laundry to 52.95 percent. A substantial number depend on tubed/piped deep well for drinking water (14.73%), for kitchen purposes (13.92%) and for laundry (12.95%). Tubed/piped shallow well furnishes more households with water for drinking and for kitchen use, 10.73 and 9.52 percent, respectively, than for laundry (8.72%). An almost equal number of households use the faucet, community water system for drinking (7.49%), for kitchen use (7.23%) and for washing clothes (7.13%). A moderate number of households still drink water from spring (6.54%); 6.25 percent depend on it for kitchen use and 6.06 percent, for laundry. Lake, river, stream, irrigation and the like are relied upon primarily for laundry (12.09%) rather than for drinking (5.60%) and kitchen purposes (6.56%). Only 0.07 percent depend on rain for drinking and kitchen use while 0.10 percent use it for laundry.

### **KIND OF LIGHTING FACILITIES**

Kerosene illuminates the abodes of 83.00 percent of the households; electricity, 10.34 percent; and LPG, 3.72 percent. Only a few use oil (0.54%) and 2.40 percent use other kinds. Kerosene is dominant in the rural areas with 88.77 percent of the households using it, but is pushed down in the urban areas by electricity which is used by 36.55 percent of all urban households as against 61.30 percent for kerosene. Further, other kinds of lighting facilities such as candle or wax are resorted to in the rural areas by 3.00 percent compared with 0.14 percent for the urban areas.

### **COOKING FUEL**

A large majority of the households cook with wood or charcoal (88.65%); 8.05 percent, kerosene; 2.07 percent, liquefied petroleum gas (LPG); 0.51 percent, electricity; and 0.72 percent, other fuel. Nine out of 10 of the rural households use wood or charcoal (90.36%) compared with 82.22 percent among urban households. Kerosene is used by 8.66 percent of the urban households, followed closely by liquefied petroleum gas (8.02%). Only 7.90 percent among rural households use kerosene while barely 0.48 percent use liquefied petroleum gas for cooking.

### **TOILET FACILITIES**

More households have the open pit type of toilet facility (29.68%) while the closed pit type follows closely with 24.33 percent. Fewer households use the water-sealed type (16.18%). Other types of toilet facilities such as the pail system are availed of by 2.59 percent, while still a large proportion of households (27.22%) do not have any toilet facility

## **A BRIEF ANALYSIS**

at all. The proportion of rural households using the open pit (34.00%) almost triple the number of users in the urban areas (13.42%). The water-sealed types are being used by more urban households (39.91%) than the closed and open pit types, 25.86 percent and 13.42 percent, respectively. The proportion of rural households not using any type of toilet facility (30.78%) more than doubles that of urban households (13.80%).

### **OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR/FREEZER**

More than half of all households possess a radio (54.26%); 0.23 percent, television set and 2.59 percent, refrigerator or freezer. Ownership of these three appliances are more widespread among urban households than among rural households. In the urban areas, 67.17 percent own at least one radio for each household; 0.71 percent are television set owners; and 8.50 percent have refrigerators or freezers. The corresponding proportions for rural households are 50.83 percent, 0.10 percent, and 1.02 percent, respectively.

## CERTIFICATION

I HEREBY CERTIFY that the data set forth in this form were personally obtained by me in accordance with the rules and regulations promulgated by the National Census and Statistics Office.

Name of person accomplishing this form  
(Printed Name & Sign)  
Title \_\_\_\_\_  
Date \_\_\_\_\_ 1980

PERSONS TO BE ENUMERATED AS MEMBERS OF COLLECTIVE HOUSEHOLDS

1. HOTELS, LODGING HOUSES, DORMITORIES, ETC.

- a. Proprietor, manager and employees living in the establishment, except those living therein with their own families and those who usually go home to their respective families at least once a week.
- b. Permanent lodgers/boarders (those who have stayed or expect to stay for one year or longer) and those temporary lodgers/boarders who have stayed for six months or longer as of May 1, 1980 or have been away from their own families for the same period. However, exclude those who usually go home at least once a week.
- c. Lodgers/boarders who are not residents of the Philippines and who have been in the Philippines for one year or longer as of May 1, 1980, or expect to stay in the Philippines for one year or longer. However, exclude those who have temporary place of residence elsewhere in the Philippines to where they usually go home. Exclude also diplomatic representatives of UN, JLO or USAID officials who, like diplomatic representatives, are subject reassignment to other countries after their tour of duty in the Philippines, and members of their families.

2. HOSPITALS AND NURSES' HOMES

- a. All patients, including those just confined, in mental hospitals, leprosaria or leper colonies, pavilions of tuberculosis sanatoria where patients stay more or less permanently, and rehabilitation centers for drug addicts.
- b. Patients who have been confined for six months or longer as of May 1, 1980 in other kinds of hospitals and in wards for temporary confinement in tuberculosis sanatoria.
- c. Nurses in nurses' homes who do not usually go home at least once a week.
- d. Staff members and employees living in hospitals/nurses' homes, except those living therein with their families and those who usually go home at least once a week.

3. WELFARE INSTITUTIONS (Homes for the Aged and Infirm, Orphanage, Boys' Town, etc.)

- a. All inmates or wards, including those just confined.
- b. Staff members and employees living in the institutions, except those living therein with their families and those who usually go home at least once a week.

4. CORRECTIVE AND PENAL INSTITUTIONS

- a. All prisoners in national prisons and reformatories (welfareville).
- b. Prisoners and detainees in provincial or city/municipal jails who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980, or those whose sentence is for six months or longer even if the sentence is on appeal.
- c. Staff members and employees living in the institutions except those living therein with their own families and those who usually go home at least once a week.

5. CONVENTS, NUNNERIES, SEMINARIES, AND BOARDING SCHOOLS

- a. Monks, priests, ministers, nuns, seminarians etc. However, priests or ministers of sects other than the Roman Catholic Church who live in the convent or house close to church or chapel with their own families are to be excluded (private households).
- b. Students in boarding schools (schools where students are required to stay in the school campus).
- c. Staff members, employees and helpers living in the premises, except those living therein with their own families and those who usually go home at least once a week.

6. MILITARY CAMPS AND STATIONS (PC, Army, Air Force and Navy): PMA

- a. Officers and enlisted men/draftees, except those who live in the premises with their own families and those who usually sleep most nights with private households or in hotels, lodging places or dormitories. Include those belonging to the unit in the camp or station who are away on military operation or mission or aboard naval vessels, except those whose families are living in the camp or station (their own families will report them).
- b. PMA cadets and trainees whose training is for six months or longer.
- c. Detainees who have been continuously confined for six months or longer, including confinement elsewhere, as of May 1, 1980.
- d. Civilian employees living in the camp or station, except those living therein with their own families and those who usually go home at least once a week.

7. LOGGING, MINING AND CONSTRUCTION/PUBLIC WORKS CAMPS; PLANTATIONS AND AGRICULTURAL/FISHERIES EXPERIMENTAL OR BREEDING STATIONS, ETC.

- a. Proprietor, manager, contractor and employees who do not live with their families in the premises and are supplied lodging (beddings, etc.) and/or meals by the company, firm, contractor or agency, except those who usually go home at least once a week.

8. OCEAN-GOING AND INTERISLAND/COASTAL VESSELS OR DEEP-SEA FISHING VESSELS

- a. Filipino crew members of ocean-going vessels (whose own families live in the Philippines) at port as of 12:01 A.M. May 1, 1980, except those who usually go home to their own families in the Philippines at least once every six months.
- b. Any crew member of interisland/coastal vessel or deep-sea fishing vessel at port on any day during the enumeration, if the crew member has no home other than the vessel.

9. REFUGEE CAMPS

- a. Filipino citizens working and living inside the camps.
